

## UNESCO World Heritage Sites Analysis

### Dashboard & Story Report

**Tool Used:** Tableau Public

The dashboard includes interactive visualizations and filters to analyze UNESCO World Heritage Sites (2019 dataset).

### Dashboard Features

- Interactive Filters – Country, Region, Year Inscribed, Category (Cultural/Natural/Mixed)
- KPI Indicators – Total Heritage Sites, Total Sites in Danger, Risk Percentage
- Charts Used – Treemap, Pie Chart, Line Chart, Bar Chart

### Story Explanation

1. Slide 1 – Introduction to UNESCO dataset and project objective.
2. Slide 2 – Country-wise Heritage Distribution Analysis.
3. Slide 3 – Sites at Risk (In Danger vs Not in Danger).
4. Slide 4 – Regional Inscription Trends over the years.
5. Slide 5 – Key Insights and Final Conclusion.

### Submission Requirements

Include the following in your project folder:

- Flask Folder (app.py, templates, static)
- Dataset (whc-sites-2019.csv)
- Tableau Dashboard File (.twbx)
- Story & Dashboard Documentation (PDF/Report)
- README.md file
- GitHub Repository Link
- Tableau Public Dashboard Link
